PLATINUM BRUSH - CERAMIC CYLINDER

PLATINUM BRUSH - cilindro in ceramica

- CERAMIC COATED CYLINDER : the heat is spread evenly over the surface preventing damage to skin and hair. A brush made with traditional aluminum cylinders not treated tends to accumulate a lot of heat in a single point which consequently heats excessively. The cylinder of PLATINUM instead is covered with ceramic heat is dispersed evenly over the surface thus preventing possible damage to the hair and skin. also Ceramic is a non-metallic mineral chemically crystallized worked at high pressure and high temperature generally termed Bio- ceramic. This material Bio-Ceramic releases infrared rays that prove to be extremely beneficial to avoid the formation of split ends and protecting the skin from excessive heat.

- NANO SILVER TECHNOLOGY prevents the formation of bacteria and fungi. silver (Ag +) has been recognized from ancient times as a substance that possesses the natural powers that help prevent the formation of fungus and bacteria that possess antibacterial properties. To maximize these benefits using the ' Nano Silver Technology'. In other words when the silver is divided into units of nano-sized ie 1 millionth the thickness of a human hair the inherent advantages of the Silver that include anti-bacterial function detoxifying and sterilizing become even more concentrated and effective. Using the brush with Platinum Nano Silver Technology hair will gain a definite benefit.
