EVOLUTION OF THE COLOR CONTRAST EVOLUTION OF THE COLOR CONTRASTI

It is a method of staining with advanced technology designed to achieve color contrast on dark bases or medium dark, natural and colored. The innovative formula, Crystallized Color Complex, is based on a special complex, the result of a synergy between : micropigments crystallized that achieve brilliant color effects and prolong color hold ; MSO (Meadowfoam Seed Oil) intensification of color that creates a strong bond between the pigments to obtain a compact and uniform color.

Shades available in 5 shades : VIOLET RED, RED, RED COPPER, COPPER, BRONZE.

box: 60 ml tube.
