shades : available in 134 color shades permanent, ammonia free color 46 shades, 18 shades tinting shades and 6 contrast color three in one.

method of use : Emulsion choice oxidant cream : 10 volumes (3%), to darken a tone, color bleached hair. 20 volumes (6%), for tone-on- tone color, cover gray hair, lighten a tone. 30 volumes (9 %) for bleaching medium (2 or 3 tones). 40 volumes (12 %), for lightening strong (3 or 4 tones). To lighten more than 4 tones you need to use the nuances of the series superschiarente.

PREPARATION : In a non-metallic container and mix a portion of cream on one side and a half (1:1.5) of oxidizing emulsion cream of your choice. If you use any of the series superschiarente shades, mix one part cream to two parts and a half (1:2.5) of oxidizing emulsion cream in 40 volumes.

APPLICATION : spread the mixture evenly on the prepared dye unwashed hair, leave on for about 30 minutes. After the exposure time, gently rinse your hair with lukewarm water and then after a shampoo - color (pH 4.5).

package : 100 ml tube.
