STEAM CARE

steam plate with titanium plates

The plate STEAM CARE is the professional plate with steam emission. The combination of steam and the lotion , KerAloe, (composed of Keratin and Aloe Vera) releases nutrients and protective properties at each step is entering the hair shaft, protecting it and keeping it hydrated for a long time. A real spa treatment for hair. The steam emitted to produce a long lasting ironing moisture-proof , prevents the formation of split ends and avoids the damage caused by the warmth typical of traditional plates. The dishes made of Titanium Ion & Tourmaline are ionizing action and make your hair soft and shiny like silk for a extra smooth styling and durable. Titanium , being an element with very high heat resistance allows the distribution of the same , for a smooth and healthy quickly. The ceramic resistance MCH Technology allows the plate to reach the temperature in a few seconds up to 230° C and keeps it constant throughout time.

Features:

- steam function for perfect styling effect prolonged smooth , anti-moisture;
- treatment with steam and KerAloe lotion;
