GL3200
hot technology

the classical system of Great Lengths which paved the way for innovations in the world of extensions. The application machine GL3200 is heated on one side reaching approximately the same temperature as a standard iron to curl your hair. Unlike other methods which are used glue guns and wax melting pots GL3200 application allows clean and precise. The tiny seam that you get with this system can be brushed is durable in time and of primary importance does not damage the natural hair.
