LONDACOLOR PERMANENT LONDACOLOR PERMANENT

It contains the improved *formula of Vitalection microspheres*, thanks to which color-saturated molecules penetrate inside, where they merge into groups and locate themselves in the hair cuticle. The product gives the hair an intense and fresh color that lasts a long time. It provides the effect of perfect coverage. Specially selected ingredients neutralize the smell of ammonia. The cosmetic has a creamy texture that facilitates its application. In addition, the composition has been enriched with waxes and lipids. These ingredients nourish the hair and provide them with an optimal level of hydration, inhibiting the evaporation of water from them.

nuances: LONDA PROFESSIONAL LONDACOLOR PERMANENT hair dye cream is available in 121 shades.

how to use: mix the hair dye cream with the LONDACOLOR PERMANENT CREAM oxidizing emulsion in a ratio of 1:1, for example 60 ml dye cream + 60 ml oxidizing emulsion. Use the oxidant with the force of 6%, 9% or 12% depending on the desired effect. After mixing in a bowl and wearing protective gloves, apply to dry hair by distributing the product from the base to the tips. Leave on for about 15-20 minutes. Finally, wash thoroughly with warm water.

packaging: 60 ml tube.
