DNA COLOR DNA COLOR

advanced dynamic natural color to the fruit vitamins

It is a coloring treatment with an excellent hydrating and protective effect due to the active ingredient of Vitamins Fruit. It allows you to enhance, cover and create colors by increasing the beauty and brightness of all types of hair. Shot mixed with Oxidant Emulsion provides optimal coverage of white hair with complete naturalness and uniformity of result. Ensures accurate colors and stable over time in the maximum respect of the scalp and hair. To ensure these results, the color COLOR DNA was analyzed and tested and analyzed by the University of Pavia, Department of Physiological Sciences - Drug resulting dermatologically tested and non-irritating.
