#### COMPANY

**TRADITION MEETS NEW IDEAS AND THE FUTURE IS BORN**

***"My experience and background are the result of the precious and incessant work in the family business, a leader in the field for three generations. I felt that enriching and completing my career path meant laying the foundation for something new, something that was closer to my way of understanding work and creativity. I tried to combine consolidated aspects, such as the choice of quality products and innovation in research, with a different mood, especially in the creation of a new image and in corporate communication.***

***For foreign markets, knowing that you can count on a product that boasts Italian origin and manufacturing is synonymous with quality, innovation and low costs. Furthermore, our fashion proposals continue to be recognized as landmarks all over the world. "***
